Students love working with the Abacus. The tool allows them to think visually, kinesthetically, and truly experience the patterns and movement in Mathematics.

- 1ST Grade

My students are learning very fast and the teachers are so loving and caring. A lot of hands on and it adds on with the regular mandarin classes that my students have.

- Transitional Kinder

In addition to learning about the rich culture of Tai-Chi and Chinese Chess, both my students' mind and body are actively engaged in this experience throughout each class. They are truly having a great time

- 5th grade immersion class, Tai-Chi and Chinese Chess

The students of Barnard are using the Mandarin language in an authentic context, gaining a greater appreciation for the culture, and 100% engaged in learning!
